## THE QUEEN'S STORY

Once upon a time in 2014, Candice began with one simple idea: everyday glassware should feel extraordinary.

Inspired by a sparkling moment at a wedding reception, Candice returned home and gathered her family around the kitchen table to bring that vision to life — creating jeweled glassware unlike anything on the market.

What started as a dream has grown into a beloved brand featured in retailers nationwide. Every piece is still proudly handcrafted in the USA at The Queens' Jewels' St. Louis facility using the company's patented process.

The Queens' Jewels has been featured on Good Morning America, QVC, Live with Kelly & Ryan, The View, and has created custom glassware for renowned names including NASA, Biltmore, Dollywood, Buc-ee's, Caesar's Palace, Warner Bros., and Miranda Lambert.

At its core, The Queens' Jewels is about celebrating life's moments and making every woman feel special, confident, and worthy of a little sparkle.

From our family's castle to homes across America welcome to The Queens' Jewels.
